

# Cleaning Women Technical Rider

## HOUSE SOUND REQUIREMENTS:

**Public Address:** At least two-way professional sound system with subwoofers. Has to provide enough power to perform a good-sounding show without clipping.

**Front of House:** Mixing console with at least 16/4 aux channels. Preferrably Analog.  
Midas Venice is very okay, Behringer is not even considered a mixing console.  
2 multieffects (tap-tempo delay + reverb)  
Compressor for (at least) 6 channels

**Monitoring:** 3 monitor groups i.e. one channel for each musician.  
4 good-sounding monitor cabinets.  
Cleaning Women's drummer uses wired in-ear monitoring system,  
therefore no cabinet for him, just 1xMale XLR.

**Personnel:** At least one english speaking professional (and sober) sound technician who is familiar with the system and who is supporting our own sound engineer.

## BACKLINE REQUIREMENTS (IMPORTANT!):

TWO stacks of 300W bass amplifiers, (Ampeg SVT is great). **2 bass players in the group!**  
Guitar amp (Fender Vibrolux, Fender Twin or similar)  
Carpet under the drumset.  
Drum seat with adjustable height.  
2 x Snare stands

Please notice that we have many large and heavy instrument cases with us.  
For transportation we need a van or other big car!!!!!!!!!!

If some of the requirements listed here seem to be extremely hard or impossible to actualize, please be in contact with us and we'll sure find a solution to fix the problem. Thanks!
